RWANDA'S NATIONAL PARKS

VOLCANOES NATIONAL PARK

Situated in the far north-west of Rwanda, Volcanoes National Park protects the steep slopes of this magnificent mountain range – home of the endangered mountain gorilla and a rich mosaic of montane ecosystems, which embrace evergreen and bamboo forest, open grassland, swamp and heath.

Volcanoes National Park is named after the chain of dormant volcanoes making up the Virunga Massif: Karisimbi – the highest at 4,507m, Bisoke with its verdant crater lake, Sabinyo, Gahinga and Muhabura.

NYUNGWE NATIONAL PARK

One of the oldest rainforests in Africa, Nyungwe is rich in biodiversity and spectacularly beautiful. The mountainous region is teeming with wildlife, including a small population of chimpanzees as well as 12 other species of primate, including the L’Hoest’s monkey endemic to the Albertine Rift.

With 15 trails along with various other activities, visitors can choose to sample the delights of the forest or indulge themselves for a week or more in one of Africa’s most stunning forests.

AKAGERA NATIONAL PARK

The relatively warm and low-lying plains of Akagera comprise savannah, woodland, wetland and a dozen lakes. In partnership with African Parks, Akagera National Park transformed into a world class location to experience a safari.

Visitors can encounter rhino, lion, leopard, elephant, buffalo, giraffe, hippo, zebra, baboons, vervet monkeys, an incredible 490 bird species, plus much more.
